Remove the Flu Virus From the Air In Your Home

Trane, the manufacturer of the industry's most effective Indoor Air Quality (IAQ) whole-house air cleaner, CleanEffects, provides a product that removes and neutralizes more than 99% of the flu virus. CleanEffects also filters out 99.98% of all particles that irritate breathing down to 0.1 microns. A human hair is about 700 times larger. That level of filtration allows everyone in your home to breathe freely and easily while dramatically reducing asthma and allergy symptoms. CleanEffects also neutralizes odors, and as one of our recent customers told us, it reduces the number of times their house needs to be dusted. Following are excerpts from an email that we recently received:

A cut-away of the Trane CleanEffects filter showing the field charger and reusable cells

"With this new air filtration system, the air inside our house changed dramatically. I could breathe easier, and with the medicine and the better air quality, the bronchitis cleared up...Since I have been home from the hospital, it doesn't hurt to breathe anymore. There is less dust in our house. I sleep

better now because I can breathe better. My asthma is under control."

This is just one of the many customer emails we receive about the quality and superiority of Trane's CleanEffects IAQ product. We also receive email after email about the superiority of our service. Whether we are installing a new heating and cooling system with CleanEffects, repairing a plumbing issue, or servicing your systems, at Day & Night, we offer technical perfection and unparalleled customer service.

Call us today at 602.956.9404 to request information about purifying the air in your home and breathing easier, thanks to CleanEffects.

Offset the Cost of a New A/C by Saving on Your Power Bill

Energy Saving Tips and Tricks For Your New A/C

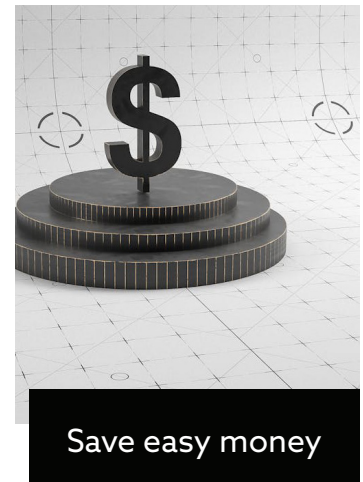

A new A/C system saves about 30% on current electric bills, which can be used to offset the cost of a new unit. Here are some simple tips to start your energy savings today:

Change the air filter as recommended - doing this keeps dust from building up on the coil and allows for more efficient operation.

Make sure the outdoor components can breathe. Clean away any debris that inhibits airflow.

Make sure the vents in your home are not blocked by furniture and other household items.

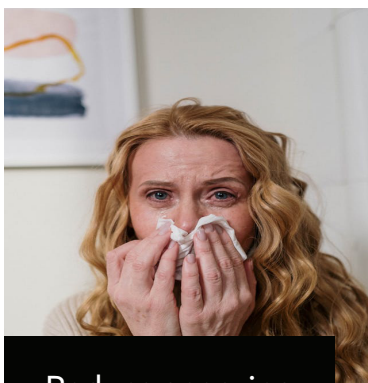

Hire a professional to service your system at the recommended intervals, just like we do for our cars. This ensures maximum performance and lifespan.

Save easy money

Indoor Air Is Dirtier Than Outdoor Air?

The seriousness of the resulting health problems depends upon the exposure length and the particles' size. Both coarse particles, measuring 10 microns or less, and fine particles, measuring 2.5 microns or less, can get trapped in your lungs when breathed in. Short-term exposure, measured in hours or days, can aggravate allergies and cause asthma attacks.

Reduce sneezing

Long-term exposure, measured in years, can cause reduced lung function and chronic bronchitis. Even healthy people can experience symptoms such as irritation of the eyes, nose, and throat, as well as shortness of breath. You don't have to live with the risk. To filter out particles down to 0.1 microns, call Day & Night today at 602.956.9404 and ask about Trane CleanEffects.

Call Us at 602.956.9404 With Any Questions

Ten Year Old Water Heaters Can Flood

The typical water heater holds eight hundred cups of water. If your water heater is more than ten years old or has never been serviced, it may be compromised and could flood.

Eight hundred cups of water flooding into your home will be costly. Whether you need to have your water heater serviced, which can also improve the volume of hot water produced, or replaced, take advantage of Day & Night's honest, ethical, and experienced plumbing department.

Finding an ethical plumber can be tricky. Day & Night has that taken care of for you as our [2021 Torch Award for Ethics](#) proves.

Our Risk-Free 3 Guarantees*

We are not satisfied until we know we provide the best products and service at the valley's most competitive prices. Please call us to discuss our Risk-Free 3 Guarantees* and what they mean for your home. Our Risk-Free 3 Guarantees feature:

1. The Best Price Guarantee
2. The One Year Buy Back Guarantee
3. The Unmatched Service and Installation Guarantee

Day & Night strives to make doing business with us as easy and stress-free as possible. Give us a call today at 602.956.9404 to get your A/C, heating, and plumbing questions answered and your expectations exceeded.
